About Me

A front end developer building functional and accessible web applications with strong visual appeal. My approach to development is underpinned by my experience in an agile technical support and a background in visual arts and design. I'm a solutions focused developer that genuinely thinks about every interaction users will experience on my applications.

Skill Samples

- HTML5
- CSS3 / SCSS
- Javascript
- jQuery
- ReactJS
- Photoshop
- Illustrator
- Procreate
- Git & Github
- + More

- [Live Link](#)

Work Experience

ecobee

Technical Support Specialist // October 2017 - November 2019

- Stepped in as Technical Support Team Lead to fill in gaps as needed
- Worked with developers on resolving technical issues, which included managing tickets using Jira and Confluence and finding solutions for software and hardware issues
- Collaborated with QA to test issues with products and software and delivered test outcomes to various development teams
- Provided timely customer feedback to the Lead Developers to improve user interface and user experience of ecobee products
- Would give time sensitive technical troubleshooting to clients on live chat/phone while multitasking to problem solve issues over email.
